

Instructions:

1)Enter the name of student

2)Enter the path directing towards the source folder that contains the java files of project of above student.

Eg.

C:\Temp\set01\Sample1

Here Sample1 folder contains the java files

NOTE: Make sure that any folder name in the path doesn't have blank space in between. So for example C:\Temp\set 01\Sample1 will not work because of space between set and 01.

3)Enter the name of other student

4)Enter the path directing towards the source folder that contains the java files of project of this student, similar to the way you did in step 2.

5)Click on Perform Test! Button to start the test.

6)You will be redirected to report page which shows the list of similar functions and you can save this report or download the pdf version.

Extras:

Click on the user icon in the footer to go to the main page.

Click on the off icon in footer to logout of the system.

Click on "View your saved reports" link in header to see your previous reports.
